

Both of them  
are straightening  
their teeth.

But the one  
on the right  
is using

**invisalign®**

Now you can with Invisalign® orthodontic treatment! Invisalign® uses a series of clear plastic aligners to reposition teeth. The aligners are virtually invisible, so you can wear them without being self-conscious. Remove them when you are eating or brushing and flossing!

The aligners are made through a combination of special impressions (molds) made in our office and state-of-the-art, computerized, 3-D imaging technology patented by the Invisalign corporation. The length of treatment varies from patient to patient. However, results are often obtained in one year.

If you want to know more about Invisalign®, the invisible orthodontic treatment option, and if it is right is for you, call our office at 781-821-2120.
